

GERMAN ROACH TREATMENT PREPARATION INSTRUCTIONS

PREPARATION IS NECESSARY PRIOR TO TREATMENT

- All kitchen cabinets, storage cabinets, pantry and cupboards are to be emptied out completely - like the day you moved in. Kitchen drawers are to be emptied, but not removed
- Clean areas under cabinets, sinks, stoves, refrigerators, etc.
- Clean and remove all items in the bathroom cabinets and drawers
- Vacuum all areas as you remove the items
- Wipe down all cabinets, counters, appliances
- Unload the dishwasher
- Take everything off the stove
- Clear counter space
- Take all garbage outdoors away from structure
- Pickup and remove all pet food dishes

IMPORTANT!!!

- Before Treatment, remove birds, fish and other pets, from the residence. If fish cannot be removed disconnect air pump and cover tank with plastic sheeting and secure tight.
- After initial treatment all persons and pets must stay out for 2 hours

AFTER TREATMENT

- Use a damp rag and wipe down leaving a ½ inch along the edges of everything. Let it stay for 2 months. This powder is **less toxic than Borax**, if left alone it will continue to work.

TIPS ON KEEPING YOUR HOME GERMAN ROACH FREE....

- Clean all spilled food and liquids
- Keep food tightly sealed
- Rinse bottles and cans before putting them in the trash
- Do not leave pet food in dishes overnight
